Cellanyx CEO addresses the importance of laboratory incubator space in Massachusetts on a Massachusetts Life Science Center Panel during BIO, 2017

Beverly, MA, July 21, 2017 – Cellanyx CEO participated in panel discussing the importance of laboratory incubator space to the growing list of biotech startups during the [Massachusetts Life Science Center Panel](#) at BIO 2017. The BIO International Convention is the largest global event for the biotechnology industry and attracts the biggest names in biotech. The conference offers key networking and partnering opportunities, and provides insights on the major trends affecting the industry. The Massachusetts Pavilion theme: Lifecycle Massachusetts aimed to show convention-goers the depth and breadth of life sciences in Massachusetts.

About Cellanyx

Cellanyx is developing a proprietary living cell phenotypic cancer diagnostic platform to aid clinical decision making. The company's unique 'biopsy-on-a-chip' methodology provides quantitative, actionable assessment of individual cancer cells in biopsy samples using multiple phenotypic biochemical and biophysical markers of tumor aggressiveness and metastatic potential. Cellanyx has demonstrated clinical proof-of-concept with its lead product in development, a diagnostic to improve risk stratification in men with prostate cancer. Learn more at www.cellanyx.com.
